Dominica Spain  
Finland Sweden  
France Turkey  
Germany United Kingdom  
Hungary United States

28 COUNTRIES REPRESENTED IN 2017

## 3 Most Common Attendee Specialties in 2017

98%

of surveyed attendees obtained new knowledge from the conference

40% learned about new PIDs

88.5% say the skills/strategies/abilities obtained will potentially affect their patients' outcomes

"I walked away from this conference with clear and concrete ideas of how to further clarify the diagnosis on many of my patients from a genetic standpoint, how to help my patients benefit from research advances, and how to enhance their care"

"This was a fantastic conference. As an infectious disease physician who provides PID care in an area that is underserved by immunologists, I found this meeting to be very high-yield and directly applicable to my practice."

"I appreciate the approachability of all the meeting faculty, and their willingness to answer my direct patient care questions and their offers to collaborate with us to promote research based on patient care."
