## **CIS Diagnostic School**

- This program is aimed at anyone who is interested in understanding how to effectively and appropriately harness diagnostic tools currently available in order to provide the best benefit to their patients. The three day program will provide an intense visual, hands-on, and didactic experience in diagnostic and clinical immunology, allowing the opportunity to learn from leaders in the field. Participants will spend time in case-based teaching sessions and also learn to analyze flow cytometric and genetic data.
